Frontend Engineer

Frontend Engineer with 6+ years of experience building reliable, user-focused products across web platforms. Strong track record in architecture, performance optimization, and cross-functional collaboration with measurable business impact.

Technical Skills

Languages	:	JavaScript, TypeScript, React, Node.js, Python, SQL, System Design, REST APIs
Tools	:	Git, Docker, Kubernetes, AWS, Postman, Jira, CI/CD
Soft Skills	:	Leadership, Communication, Problem-Solving, Mentoring

Experience

Frontend Engineer — Jan 2022 - Present
Northstar Technologies — *New York, NY*

- Led architecture and delivery of a multi-tenant SaaS platform used by 150K+ monthly active users.
- Reduced page load time by 42% through rendering optimization, bundle splitting, and caching strategies.
- Built internal observability dashboards that cut incident triage time from 45 minutes to under 15 minutes.
- Mentored 5 engineers, improved code quality standards, and reduced production defects by 33%.

Software Engineer — Jul 2019 - Dec 2021
Bluewave Systems — *San Jose, CA*

- Developed and maintained APIs and frontend workflows powering core customer onboarding journeys.
- Implemented automated CI/CD pipelines that shortened release cycles from biweekly to daily.
- Collaborated with product, design, and data teams to launch 25+ customer-facing features.
- Improved API reliability to 99.95% uptime by hardening retry logic and error monitoring.

Software Engineer Intern — May 2018 - Jun 2019
Orbit Labs — *Remote*

- Built internal tooling for QA workflows that reduced manual test preparation effort by 50%.
- Implemented analytics tracking for key product funnels and published weekly stakeholder reports.
- Documented reusable engineering playbooks adopted by three cross-functional teams.

Education

University of California — Berkeley, CA
M.S. in Computer Science — *2017 - 2019*

State University — California, USA
B.S. in Computer Science — *2013 - 2017*

Projects

Resume Intelligence Platform — *React, Node.js, OpenAI API, PostgreSQL*

- Designed and shipped end-to-end resume optimization workflows with live ATS scoring.
- Built template rendering and export pipeline supporting LaTeX, PDF, and print-ready formats.
- Implemented role-based recommendation engine that improved completion rate by 29%.

Operations Analytics Hub — *Next.js, Python, FastAPI, BigQuery*

- Created interactive KPI dashboards with drill-down filtering for product and leadership teams.
- Reduced query latency by 37% using pre-aggregation and scheduled data materialization.
- Automated monthly reporting workflows, saving 12+ analyst hours per sprint.

Incident Automation Bot *Node.js, Slack API, Redis*

- Built automation bot to orchestrate incident workflows and stakeholder communications.
- Integrated runbook recommendations that reduced mean time to recovery by 24%.
